Instructions to the students

Aim of the preparatory work
You know how important sound Ethical considerations are in any research proposal. This applies to an Evaluation proposal as well, and we want you to think in which ways these are similar and/or different to non-evaluation research.

Instructions
1. Prepare a list (1 page) of the ethical issues that should be covered in qualitative (not evaluation) research, highlighting the issues you think will apply to evaluation research. For those who have encountered real-life ethical challenges, please add this and how it were solved.

2. This must be submitted to willem.odendaal@mrc.ac.za no later than 28 October.
